Port name:	Hazira		
Port facility name:	Hazira (Surat) Port		
IMO port facility number:	IN220-0002	Latitude:	21° 6' N Longitude: 72° 37' E
Description:			

Port Facilities - India

The Royal Dutch / Shell Group of Companies ["Shell"] has developed a Liquefied Natural Gas ["LNG"] receiving terminal at Hazira, Gujarat. The port development plan includes the long-term port development with non-LNG cargo terminals (container and bulk terminals). Construction of an LNG import terminal in the new port at Hazira started in April 2002. The LNG terminal will initially handle about 2.0 Mtpa (Phase 1A), expanding to a long-term throughput of 10.0 Mtpa. Studies are ongoing for the development of non-LNG cargo terminals in the port (Phase II). The LNG terminal is situated in the inter-tidal zone directly west of the forest boundary line. Number of LNG berths: - 1, Minimum depth on berth- 13 m CD. Approach channel: An entrance channel connects the port with the deep water of the Sutherland Channel. The dredged depth of minus 12 meter CD allows for arrival and departure of LNG carriers up to a draft of 11.5 m. The straight approach channel has a clear width of 400 m at the seaside tapering off to a width of 300 meter between the breakwaters to allow unobstructed easy entrance/departure of ships. The orientation of the approach channel is heading 070 - 250 degrees north. LNG jetty General description: The berth of the LNG jetty is orientated 225 degrees north to minimize the anticipated downtime as a result of the combination of wind, waves and swell. The jetty consists of: - Four breasting and five mooring dolphins fitted with fenders and quick release hooks and accessible by catwalks. - An unloading platform with a concrete deck providing support for piping and equipment. - A trestle to shore accommodating piping, cables and a roadway for personnel access and small vehicles. - The LNG jetty is equipped with a mooring load monitoring system, a berthing aid system and an environmental monitoring system. - An early warning system is provided allowing LNG-C's to leave the berth in time in case a cyclone or excessive monsoon waves approach.

Port Facilities - India

Port name:	Cochin		
Port facility name:	Kochi Port Trust		
IMO port facility number:	INCOK-0002	Latitude:	9° 58' N Longitude: 76° 14' E
Description:	Cochin is an all weather port on the western coast of the Indian peninsula located on the Willingdon Island, latitude 09 deg 58 min North & longitude 76 deg 14 minutes East. The port was developed between 1920 & 1940, opened in 1930-31 for vessels up to 30 feet draft. The port has anchorage beyond fairway buoy. Vessels enter port through 10,000 x 200 m wide and 11.7 metre deep outer channel, which bifurcates into two channels, Ernakulam towards north-east and Mattanchery towards south-east. The average Pilotage time is about one hour from the Fairway Buoy / Anchorage to the Port. To maintain navigability of the channels and to navigate deep draught vessels round the year, continuous dredging is done in the Ernakulam and Mattancherry channels.

Description:			

Port Facilities - India

The port is equipped with 55 berths. Spread over an area of 400 square kilometers. The port has about 6 lakh square meters of storage area for storing goods and hazardous cargo. the Jawahar Dweep (Butcher Island) of the Port has 4 jetties to handle POL tankers. An offshore berth at Pir Pau also handles liquefied gas and some the POL traffic and liquid chemicals. the anchorage area is vsst extending over 20 NM outside the harbour. Lighterage operations are carried out outside port limits at the custom notified area. The passenger ship terminal is located at the Southern most tip of the port which is adjacent to the Naval facility. The entrance to this is through the GREEN GATE. The terminal here is also used for docking of other cargo ships when the passenger ships are not berthing. Part of the building is lused as a cargo shed for the cargo brought by the cargo vessels but only when the passenger ship is not expected. The Port has got a impounded dock called the Indira Dock with a depth maintained between 8 to 9 meter. The dock has got a lock gate. There are 23 berths in Indira Dock handling containers, general cargo, like fertilizer and foodgrains and heavy lifts. There are semi-tidal docks namely the Victoria and Prince's Dock. Dock has 14 multi-purpose berths. Prince's Dock has 8 multi-purpose berth. The gates are being used during window period of 3 hours before high tide till high tide time. The lock structure is of stone masonry. Presently the Prince's dock is being used as a tidal dock.
